Bud Industries Introduces DIN Rails

Rails can be used with any industrial and commercial electrical enclosures that use 35mm DIN rail mounting

CLEVELAND, Ohio — August 22, 2012 — Bud Industries, a leading manufacturer of enclosures and cabinet racks, has introduced 35 mm DIN rails and clips for its lines of industrial and commercial electrical enclosures. The rails are designed to accept most commonly-used DIN rail mounted components and enclosures.

The new rails comply with the EN 60715 standard, and are made from 1 mm thick zinc-plated steel. They measure 35mm wide x 7.5mm high x 1 meter long, and are suitable for mounting all Bud DIN-rail mount enclosures and accessories, including the DB, DPB, DMB and TS-16 series.

Like most of Bud's inventory, the 35 mm DIN rails and DIN-rail mounting clips are in stock and ready for same-day shipment. For more information on Bud's vast inventory of industrial and commercial electrical enclosures, visit <http://www.budind.com/>.

To request a free Bud electronics enclosures catalog, visit http://www.budind.com/request_catalog.php or contact the Sales Department at:

About Bud Industries, Inc.

Founded in 1928, Bud Industries, Inc. is the nation's leading manufacturer of enclosures and related products for the electronics and data industries. The Bud line includes products ranging from small hand-held boxes to large cabinet racks, products made from plastic as well as metal, and standard electronic products as well as those that meet NEMA and seismic requirements. Bud's standard product line of more than 2,500 products is heavily stocked by distribution channels as well as by the company itself, allowing same-day shipment of more than 90 percent of the enclosures sold. Bud can make simple modifications to most enclosures to your specs in five days. Custom products are also available, as is complete design support.
